

## CASCADE FACILITY SERVICES

Through direct performance, Cascade can better control the repair and maintenance of your facilities. Our professional service technicians are full time employees who report onsite in company vehicles, wearing company uniforms and are trained to follow your company's business rules. Unlike competitors, our communications center is staffed to respond to your facility needs 24 hours a day, 7 days a week, 365 days a year.

Managing facility maintenance and repair services is a business of communication. The fact is that everything from a remodeling project to an emergency response is handled best when the communication flow is smooth. We take time, ahead of time, to map out every customer's business process and establish the business rules of the road. That way, when it's time to solve a problem, we're ready. Start to finish, our experienced professionals control the process and ensure a consistent outcome.
